CHORLTON

COLLABORATOR
Jane Leach (i-architect)

Jamie Boardman | Charlotte De Moor | Tere Sagay | Motunrayo Soyannwo | Thando Zitumane | Tobi Sobowale)

SKILLS

Design skills used and developed throughout the process include photoshop, graphic design and exploration of sustainable materials and construction methods. Students will also use and develop social skills through community engagement

AGENDA

This live, student-led project aims to revive and link the two halves of the community through the design of a centre using existing abandoned containers. BA1, BA2 and MA1 will work together to create awareness for the White House Project.
Students will produce a conceptual design proposal including a green roof and artistic mural, engage with the community and building a network through social media platforms. Working alongside the community we will produce a design that is supported by them, creating the opportunity for future crowdfunding.
