

DREAMHOUSE

for

CIRCUS

Agenda

The Circus House expects to have a new building for training, performance and social activities.

Rebuilding Crossley house youth centre to connect with the new building to increase activity space.

The project can promote residents to exercise and have more social connections.

Some of the values our design wants to emphasize:
Inclusive : Everyone is welcome at The Circus House. Beginners, professionals and everyone in between. We welcome all communities of Greater Manchester and extend our welcome to the international circus community. **Accessible** : We try to make the training facilities available and affordable to as many people as possible.

Skills

We will mainly focus on the functionality of the house as well as the design of the exterior to meet The Circus House's requirements. At the same time, as a circus house, the space we want to design must be full of fun.

Design ideas will be represented through a variety of mediums:

- Physical and Digital Models
- Plans, sections and elevations (at relevant scale)
- Presentation for a live client
- Other skills you can learn in our event
- Communicating
- Acrobatic skills

Collaborators

Our collaborator is The Circus House. They offer affordable classes in circus skills for kids and adults at any ability level. All profits are reinvested into providing better facilities and opportunities for the community so they're constantly adding more.
