

CARBON HOUSING RETROFIT

TEAM

ALIAKSEI TSIKHANCHUK (CPU)
HUI LU (&RCH)
IATHEI LUKE CHAN (CPU)
JINYU LIU (CPU)
SUPRIYA JAGTAP (&RCH)

SKILLS

research, digital output,
communication & groupwork

COLLABORATOR:

Manchester City Council
Regina Khanum, Project Manager
Robert Poole, Project Officer
C. Western, Project Officer
Emily Colgan, Project Assistant

AGENDA

Retrofit initiatives to date have focussed primarily on installing individual renewables or other low-carbon technologies. The aim of this project would be to establish the most effective overall package of retrofit measures necessary at a typical 3-bedroom mid-terrace house. The outcome for this project should be a greater understanding on what is required within the design of a retrofitted home in order to contribute to the Manchester 2038 carbon goal.
