

MANCHESTER SCHOOL OF ARCHITECTURE

AGENDA

'How Women Build' is a live research project. We will be collaborating with them in the run up to their conference and exhibition here at the MSA in June.

Their research has led to a focus on 12 female alumni from the Architecture school over the years. These women will be the main feature of the conference.

Our aim for 'How Women Build: exhibition' is to host a charrette in order to develop designs and subsequently build 12 exhibition stands to showcase those women. We will also be formatting graphics and spatially designing the exhibition.

SKILLS

The charrette will present the opportunity to expand knowledge on fabrication methods, small construction joint details, sustainable materials and feminist principles in architecture and design.
