

# MANCHESTER SCHOOL OF ARCHITECTURE

## AGENDA

Our Partner, The Make Bank, tackles **creative poverty** amongst youth in the UK by distributing materials and creatives kits. Tackling the issue of **'the unknown'** that comes with applying to Architecture School, our project aims to produce a series of **videos & tutorials** for young students thinking of studying the subject by telling **personal stories** of our journey and developing **101 Architectural Skills** videos. As a result this will essentially help to build a portfolio and give an overview of the subject.

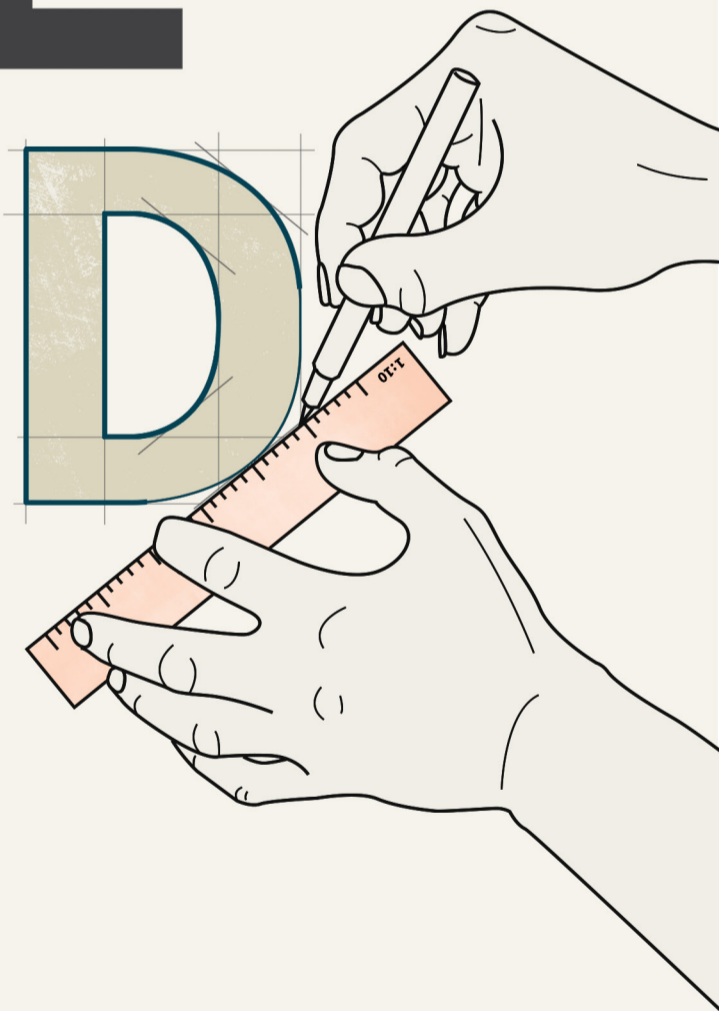

## SKILLS

The students involved in the project will be using their **sketching, photography** and **model making** skills to produce the content for these tutorials which will be edited to produce clear and easy to follow videos.
