Crafting a potting shed for Beech Road Park

AGENDA Our brief is to design a potting shed for the Friends of Beech Road Park, the design is very open, the shed can be moveable or fixed and sited wherever in the park which the team feel appropriate. Participants will be divided into four groups and given tasks which include analysing, and designing through research, drawing and model making. We will work to discover new ways of designing a potting shed which harnesses rain water and sunlight encouraging the growth of plants. Collective drawing and model making will be used to decide our concept. At the end of the first week our the design will be decided, the second week will involve finalising the design and presenting to our external partner. We are looking for some new and creative ideas where we can experiment and

SKILLS Concept design, Sketching, Paper/ Card Modelling, Photoshop, Indesign, CAD, 3D Modelling.
