

MANCHESTER SCHOOL OF ARCHITECTURE

twist

Agenda

An empty plot in the middle of the city provides those involved with Plot Twist the opportunity to rethink the urban environment. In conjunction with the Bradford Civic Society and the bid for City of Culture 2025, we will explore themes of community and agriculture in rejuvenating this area of Bradford into space unlike any other in the city. We will be designing pavilions in teams, mainly through modelmaking and charrettes, as part of a wider masterplan of the site. For this we need you, for your outside the box thinking, to help with the possibility of this real-world application.

Skills

We will be using a range of materials and software including modelmaking, virtual modelling and presentation software. However, if you have limited knowledge in these areas, we will be running fast paced workshops on: Sketchup, Photoshop, Indesign etc. If you are up for learning some new skills or developing your current ones even more then Plot Twist is the choice for you.
