HETTIE WELLINGTON

COLLABORATOR
THIS IS CHANGE
ROB TOON

CAN **WE** FIX IT?

Agenda

The positive impact of construction projects on the economy and society itself is immeasurable but the way these projects are delivered is archaic and stuck in the 20th century. The current setup doesn't promote collaborative working and has a negative impact on the wellbeing of those delivering projects. The industry is due an upgrade and this group will work together to show how construction projects can be improved through the intelligent design of temporary site accommodation.

Skills

This project will offer insight into how the construction industry works. You will learn how to create effective drawings and high quality images as well as the key skills needed in architectural education.
