

# MANCHESTER SCHOOL OF ARCHITECTURE

# YOUNG MA(R)KERS

## AGENDA

Young Ma(r)kers is a collaborative project with The Architecture School for Children (TASC), who are aiming to create a mobile gallery, in addition to a workshop space, for young people of Manchester. The goal of the project is to help young artists make a mark in the city by creating an art gallery that is transportable, adaptable and flexible to be placed anywhere in Manchester. As a creative space for young people designed by young people, the space will encourage young creatives to collaborate, express their creativity and showcase their artwork.

## SKILLS

This is an opportunity to learn and develop modelling and drawing skills, both physically and digitally. We will also be working with Year 8 students from Didsbury High School to share these skills and to inspire young creative minds.
