

MANCHESTER SCHOOL OF ARCHITECTURE

AGENDA

The agenda for this project is to develop a proposal including a master plan, visual representations (perspective), and text descriptions of the structure for the youth co-op house. This will be sent in for pre-planning submission to the council, attractive enough for approval with the aim to provide a suitable living environment for disabled and homeless youth in Manchester.

SKILLS

This project will be an opportunity to expand on skills such as site surveying, sketching/collaging, model making, 3D modelling/rendering, and work with external collaborators and consultants.

LIVING UP
