

MANCHESTER SCHOOL OF ARCHITECTURE

MYCO-POD SOW THE CITY

AGENDA

The Boiler House is a community workshop and creative space. The aim of our collaboration is to produce a material specification document and feasibility analysis for the insulation of the Boiler House utilizing Mycelium grown onsite. Additionally, we will also build a 1:1 sitting pod insulated with the same Mycelium that would later insulate their building.

SKILLS

We will use a combination analogue and digital skills including; sketching, sketch modelled, using digital drawing and modelling software, 1:1 timber construction and digital graphic layout.
