

MANCHESTER SCHOOL OF ARCHITECTURE

Agenda We are a student-led team working collaboratively with St John Centre in Old Trafford to develop alternative layout solutions for the community spaces. Our primary aim is to understand the user experience and needs requested for the centre; therefore, we will be holding workshops with the community groups involved in the centre and document the design process, with their view and opinions. We will work together to offer St. John's Centre the opportunity to improve their already long established community service.

Skills Throughout this workshop, we will engage in rapid design prototyping, the benefits of public feedback and why user experience and needs should be at the forefront of every design. You will develop skills in digital modeling, key rendering programs and several necessary softwares for an architect to produce an interactive presentation and high-quality photo realistic imagery whilst having the chance to work alongside the members of the community in Old Trafford.

St Serving John Centre Joy

Teams

Adwiteya Kasliwal
Hafsa Suleiman Adamu
Mirta Maria Silvestri
Neerzari Sureshkumar Patel
Rajvi Amarkumar Shah
Yuen Lam Lee
