

MANCHESTER SCHOOL OF ARCHITECTURE

DEEP ROOTS

AGENDA

This project will look at designing a biodiverse, community lead, gardening and growing space for the Burnside Centre, a charity with community at its core. The design will occupy a narrow space adjacent to the building, and will require creative problem solving to use vertical design to create a space where biodiversity, fruit and vegetables will thrive to show sustainable living! This project has already secured funding so our designs will potentially become reality and play a part in supporting the natural world and the Middleton Community!

SKILLS

Teamwork
Community Engagement
Creative Problem Solving
Ecological Design
SWOT Analysis
Visual Rendering with Lumion
Collage and Diagramming
Sketchup
AutoCAD
Photoshop
InDesign
Illustrator

COLLABORATOR

Burnside Centre

TEAM

Rowdah Charbak
Shanice Langford
Evelyna Hadass
Phoebe Tang
Frederick Ng
Hoay Qing Chow
