5plus Architects

AGENDA

We are MSA Group 32, and we will be collaborating with Lexington, an expert public consultation agency, and 5plus Architects to bring forward plans for age-friendly accommodation as part of the proposals for the land at the end of Ryebank Road in Chorlton, known as Ryebank Fields.

This project aims to explore what age-friendly accommodation could look like through engagement with the local community to develop the plans and how our group as students would look to design highly sustainable dwellings in Chorlton. The idea is not to aim for an "old-age home", but rather come up with a fun and vibrant living environment for over-55s, that reflects the needs and wants of potential future residents.
