

REGENERATION WITHOUT
DISPLACEMENT

BARE CREATIVES

AGENDA

Our project aims to realise an affordable live/work space for local artists in St Helens, while also promoting the potential reuse and revitalization of St Mary's Market. Through a public exhibition showcasing student visualizations in collaboration with the artists, we hope to engage with the local community and celebrate the hidden opportunities of creatives in the area. Our vision is to create an artist-led, sustainable and accessible space that reflects the needs of everyday artists and contributes to the livability and vibrancy of the town. As part of Liverpool's Borough of Culture 2023, we believe that by investing in the creative potential of St Helens, we can uncover positive social impacts, foster community engagement, and inspire a new vision for the future of the town.

SKILLS

The live project provides opportunities for students to develop critical design, communication, and project management skills in close collaboration with artists and the local community through interactive workshops and a public exhibition. This artist-driven initiative encourages creative students to freely interweave art and architecture through model-making and creating artistic spatial visualisations, to kickstart plans for real spaces that could be used in the future.
