

# MANCHESTER SCHOOL OF ARCHITECTURE

# Power to Youth

## Agenda

Students will work alongside the client and the architect to propose sustainable interventions to improve the Powerhouse, a youth hub in the heart of Moss Side. Focus areas include improving the performance of the building envelope through a fabric-first approach as well as using creative problem solving to enhance the internal spaces.

The project has secured funding, so students will get the opportunity to work with stakeholders and collaborators on a live project where their designs could potentially be realised to improve the Powerhouse's sustainability and enhance the spatial experience of its users.

## Collaborators

Moss Side Millenium Powerhouse  
Corstorphine & Wright

## Skills

SWOT analysis  
Technical resolution  
Graphical presentation techniques

Adobe Creative Suite  
Digital Modelling (Revit/SketchUp)  
CAD (AutoCAD)

## Team

Hana Wajihah Ahmad Baihaki  
Isaac Jemitola  
Megan Mew-Mcadam  
Constantin-Alexandru Visan  
Gehao Ye
