We're teaming up with Gorgeous Gorse Hill to transform an underused space into a vibrant, community-driven hub. This flexible space will offer coworking, business support, education, and a place for everyone to connect.

With innovative designs and a sustainable model, we aim to empower local businesses, provide hands-on training, and build a stronger community—ensuring the area thrives every day, not just on match days!

Throughout the workshop, students will develop skills in physical and digital model making, project planning, teamwork, networking, presentation, and sustainable thinking.
