

# AN NEW

## AGENDA

Agecroft Chapel, a Grade II listed building, sits in the heart of a Cemetery, however it has fallen into need of repair and restoration. Currently, a wooden lantern on top of the building poses the threat of collapse. Through intervention, we hope to create interest on site and interaction with this building in order to raise money for the removal or restoration of the Lantern. This project engage with the immediate community of Salford and those with familial connections to the site. Through light structures facilitating a cafe, children's space and flower garden, we intend to draw business to the Chapel and create engaging ways for the community to interact with our design. We aim to bring a sense of connection between the cemetery and the local community.
