CHADWICK DAM UNLOCKED

AGENDA

We are collaborating with Tameside Council to design a new inclusive route into Chadwick Dam, improving access for the Ridge Hill residents with a focus on inclusivity, health and well-being, and sustainability.

As part of the project, we will engage with the community through public consultations and take part in a one-week design competition to develop and masterplan access schemes, which will later be presented to our collaborators.

The designs might include landmark pavilions, travel amenities, and biodiverse planting to enhance users experiences of the route.

This is a fantastic opportunity to contribute to a real-life project with a positive social impact - while enhancing your design, model-making, and presentation skills through collaborative group work.

SKILLS

Public Consultation
Communication
Model-Making
Landscaping
Teamwork
Design

SOFTWARES

Revit
Sketchup
Adobe Suite
