THE SHED AT THE LANDING

Skills

Teamwork
Sustainable Design
Circular Economy Design
Community Collaboration
Material Prototyping
3D Modelling & Rendering
AutoCAD
Adobe Creative Suite

Agenda

Join us in designing a shed for The Landing—a garden on the roof of the Merseyway, Stockport. Providing herbs, flowers, and vegetables for a restaurant, it expanded to host various workshops, and special events, with many volunteers helping to maintain the space. The shed will provide a creative, multi-purpose shelter. We will work on-site with the volunteers to test sustainable materials such as mycelium, hempcrete, and sheep's wool, exploring their potential as building materials for the shed to create a successful, eco, regenerative space.
