

MANCHESTER SCHOOL OF ARCHITECTURE

Since 1865, Mossley Community Centre has been serving the community through a multitude of avenues; from schools to youth centres to today's community centre which houses a range of activities that are catered for all walks of life, big and small communities, **Under One Roof.**

Our approach towards the refurbishment will be guided on 5 principles: maneuverability, multi-generational, future proofing, sustainability and community-oriented design. Focusing on the toilet upgrade, sustainable and technological fabric restoration, and storage room activation, we strive to improve the user-experience of the space, and to scale up the positive impacts towards the neighborhood.
