

# MANCHESTER SCHOOL OF ARCHITECTURE

This project is a collaborative design initiative between the Manchester School of Architecture and Oswald Road Primary School in Chorlton, Manchester. Through a series of participatory workshops, Year 4 pupils (aged 8–9) will contribute ideas toward small-scale architectural interventions for a new preschool extension beginning construction in 2026. Using hands-on methods such as drawing, model-making, and material exploration, children will learn how architects design spaces while actively shaping elements of their school environment. The project aims to foster creativity, design thinking, and child agency, embedding the pupils' perspectives meaningfully within the development of their built environment.
