THE MOBEELITY HUBS

The Mobeelity Hubs reshapes everyday travel across Manchester. Together, we imagine a future network of integrated mobility hubs, welcoming transport nodes on streetsides and in off-street spaces. We aim to make sustainable travel the easiest and most attractive choice while creating hubs that feel safe, accessible, and enjoyable. These hubs will support healthier lifestyles, reduce carbon emissions, and improve air quality. This initiative, in conjunction with Manchester City Council, creates a more connected city — helping Manchester to move better, together!
